The following is an examiner's statement of reasons for allowance:

- The primary reasons for allowance for claims 1-9, 13-27, and 50-51 are the inclusion of the limitations of a printer comprising a structure having an edge extending across a majority of a first width of a media path, wherein an edge of the structure has a first continuous segment extending along a first portion of the first width of the media path and a second continuous segment spaced from the first continuous segment extending along a second portion of the first width of the media path, wherein the first continuous segment has a second width at least about 80.5 millimeters.
- The primary reasons for allowance for claims 28-36, 38, 40-44, 46, and 52 are the inclusion of the limitations of a platen comprising an edge configured to extend across a majority of a first width of a media path while contacting a print medium, wherein the edge has a first continuous segment extending along a first portion of the width of the media path and a second continuous segment spaced from the first continuous segment

extending along a second portion of the first width of the media path, wherein the first edge segment extends between a first channel and a second channel and wherein the first channel and second channel each have a width of at least about 4 millimeters.

- The primary reason for allowance for claim 53 is the inclusion of a printer comprising a structure having an edge extending across a majority of a first width of a media path, wherein the edge extends between a first channel and a second channel and wherein the first channel and second channel each have a width of at least about 4 millimeters.
- The primary reason for allowance for claim 54 is the inclusion of a printer comprising a structure having an edge extending across a majority of a first width of a media path and an ink recipient extending across the media path, wherein the structure is configured to elevate the medium above collected ink of the ink recipient by a distance of at least about 2 millimeters.
- The primary reason for claim 55 is the inclusion of a printer comprising a structure proximate a print zone of the printhead and having an edge extending across a majority of a first width of a media path and a landing opposite the structure, wherein the ink recipient extends between the landing and the structure are configured to support the media such that the media extends in an arc across the ink recipient.

- The primary reasons for allowance for claims 56-59 are the inclusion of the limitations of a printer comprising a structure having an edge extending a majority of a first width of a media path, wherein the edge of the structure has a first continuous segment extending along a first portion of the first width of the media path and a second continuous segment spaced from the first continuous segment extending along a second portion of the first width of the media path, an ink recipient extending across the media path and a landing opposite the edge, wherein the ink recipient extends between the edge and the landing.
- The primary reasons for allowance for claim 60 are the inclusion of the limitations of a printer comprising a structure having an edge extending a majority of a first width of a media path, wherein the edge of the structure has a first continuous segment extending along a first portion of the first width of the media path and a second continuous segment spaced from the first continuous segment extending along a second portion of the first width of the media path, an ink receiving cavity, wherein the first segment and the second segment are separated by a channel having a tapered floor configured to drain collected ink to the ink receiving cavity.
- The primary reasons for allowance for claim 61 are the inclusion of the limitations of a printer comprising a structure having an edge extending a majority of a first width of a media path, wherein

the edge of the structure has a first continuous segment extending along a first portion of the first width of the media path and a second continuous segment spaced from the first continuous segment extending along a second portion of the first width of the media path, a first channel adjacent a first end of the first segment, a second channel adjacent a second end of the first segment and adjacent a first end of the second segment, and a third channel adjacent a second end of the second segment.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
